Dear Dr Wang

Many thanks. I hope the tutorial goes well.

Kind regards

Annabel

Dear Prof Wang

I am Annabel Latham, my warmest greetings to you! As the Chair of the Multimedia subcommittee of Education, IEEE Computational Intelligence Society (CIS), it is my honour to write to you to ask for your permission for us to video record your tutorial at Fuzz-IEEE 2018.

We have a tradition at the CIS of recording keynote/tutorial talks given at the major IEEE CIS-sponsored conferences. We would very much like to video-record your talk and then publish it on the IEEE.tv for educational purposes, please refer to the links below:

<http://cis.ieee.org/education.html>

<https://cis.ieee.org/multimediatutorials.html>

Please be assured that posting your talk online would not take any rights away from you and you are the sole copyright owner of your materials.

If you agree to give us permission, please review and sign the attached form (Word or PDF), "IEEE

Computational Intelligence Society Speaker's Permission and Author's Release”, and email the form back to me ([a.latham@mmu.ac.uk](mailto:a.latham@mmu.ac.uk)) at your earliest convenience. You can put your electronic signature in the form or you can send to me a scanned copy.

**Please would you forward this email to other speakers as we will need permission from all of you in order to record the tutorial.**

Dr Eduardo Aguiar and Prof Dongbin Zhao will arrange the video recording of your talk at the conference.

Since the conference is approaching quickly, and the tremendous preparation and arrangements for video recording should be done early, I would greatly appreciate if you would return the form at your early convenience. If you have any questions, please do not hesitate to contact me.

I look forward to hearing from you soon and hope that your presentation and meeting at **WCCI 2018** is a great success!

Best regards,

Annabel Latham

Chair: IEEE CIS Education Multimedia subcommittee
